Big Paul's Cycle One-Piece Handlebar Mounted Clock

Big Paul's Cycle has bridged the gap between quality and price. A handsome handlebar mounted clock available in Vibrant White or Intense Black with a large easy to read dial, glow in the dark hands and numbers and show quality chrome work. Using a non-marring, stainless steel, soft tipped set screw Big Paul's clock will install quickly and securely to any 1" handlebar (will fit 7/8" bars with extended set screw, not included) One-piece design embeds the clock directly into the mount so there are no retainer rings to manage and the time and battery is easily changed by the user. This solidly built, easily read gauge is also completely waterproof and shock resistant.

For a Limited Time Big Paul's clock can be a great addition to your motorcycle, ski or ATV for \$39.95ea.

MSRP \$49.95
